(54) SPEAKER SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a speaker system and a speaker that can prevent box sounding and is hardly restricted by the layout.

SOLUTION: The circumferential part of a front of a body section (10) of the speaker is supported at a circumferential part of an opening (23) formed to a case (20) via a vibration buffer body (41), a cone (30) acting as a virtual ground is fixed to a rear side of the body section (10). The speaker system of this invention comprises the speaker containing the virtual ground (30) acting as a fixed point in the case (20) to bring the body section (10) to an ideal state with respect to vibration and supports (52, 53, 54, 55), which are suspended bodies or the like to prevent irregular reflection of sounds and vibrations.
